Regulatory Reform (Fire Safety) Order 2005

What is the Regulatory Reform (fire Safety) Order 2005

It replaces most fire safety legislation with one simple order. It means that any person who has some level of control in premises must take reasonable steps to reduce the risk from fire and make sure that everyone on the premises, or nearby, can safely escape if there is a fire.

This is different from previous legislation in that you must consider everyone who might be on your premises, whether they are employees, visitors or members of the public. You should pay particular attention to people who may have a disability or anyone who may need special help.

Where does the order apply?

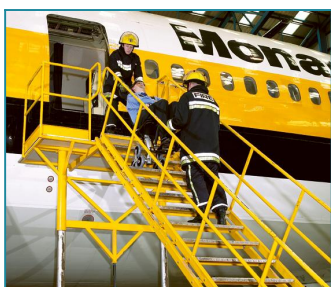

The order applies to virtually all the premises and covers nearly every type of building, structure and open space, for example:

- Schools and sports centres
- Offices and shops
- Premises that provide care including care homes and hospitals
- Community halls, places of worship and other community premises
- Pubs, clubs, restaurants
- Tents and marquees
- Hotels and hostels
- Factories and warehouses

What are the main rules under the order?

- Carry out a fire risk assessment
- Consider who may be especially at risk
- Get rid of or reduce the risk from fire as far as is reasonably possible
- Take other measures to make sure there is protection from flammable or explosive materials
- Create a plan to deal with any emergency and keep a record

PERSONAL ONSITE DEMO & SITE ASSESSMENT

Aircraft Evacuation Chair

A complete range of evacuation equipment that meet the demands of various environments

Designed for greater comfort and durability, this advanced range is ideal for patient transportation in any evacuation procedure

Lightweight yet robust high quality products

Tackle all kinds of site evacuation and emergencies with safe, easy to use equipment.
